

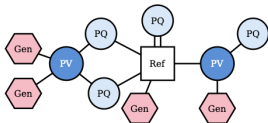

graphkit – Neural Solver Development Library

Builds, trains & evaluates models
Handles all power system computations

Datasets

Synthetic data (up to 10k grids)
Topology perturbations and load sampling

Fast & Reproducible

GENCO – Unified Neural Solver

Validated on Real-Grid Data

Power Flow

Optimal Power Flow

State Estimation

PF: full AC-PF solutions, 30x faster
OPF: 85x faster, $\leq 0.35\%$ infeasibility
SE: handles non-observable cases

Realism & Diversity

datakit – Synthetic Data Generation Library

GridFM Development Framework
